YOU CAN LOOK
To the future
WITH AMBITION

Le Mans Université, you are our ambition!

Our ambition? Success for everyone!

With us, you will never be just a number amongst other numbers. Le Mans Université has made the choice of ambition, success and development for all. Which is why we do everything in our power to allow students and working people access to higher education thanks to a wide offer of multidisciplinary training courses, innovative teaching methods and individualized accompaniment. What you learn in the classroom is based on quality research carried out in our internationally-renowned laboratories.

As a major actor in social advancement and professional integration, as well as in research and innovation, Le Mans Université is an active participant in the economic, social and cultural development of the region, thus reinforcing the University's influence and attractiveness.

Together, let's see things differently...

With over 1250 lecturers, professors, researchers, engineers and administrative and technical support staff, and hundreds of different courses, Le Mans Université has adopted an approach aimed at lifelong personal and professional fulfillment for everyone: undergraduate and graduate students, adult learners, vocational training, even study abroad.

Underlying a quality education is the University's ongoing commitment to the use of state-of-the-art individually-tailored pedagogical tools: distance learning, on-line resources, project teaching, one-to-one tutoring...

One University, multiple opportunities.

Reinforcing the link amongst research, training and innovation

The University develops diverse and quality research activities connected to its laboratories which are responsive to the essential questions of today's world. These laboratories, including several associated with the CNRS, are nationally and internationally recognized. As part of its core strategy, Le Mans Université has created thematic and/or interdisciplinary institutes aimed at fostering a three-way synergy: research, training and innovation (scientific and educational).

Our research topics are varied: acoustics, computer science, languages and literatures, molecules and materials, risk and insurance, management, law, social and human sciences, biology, sports and health...

Le Mans Université opens the way to success for its students. Research, training and innovation are our missions; authenticity, altruism and sharing make up our DNA.

A range of training courses for all stages of life

Le Mans Université proposes training courses for everyone: undergraduate students, continuing education students, distance learners, work-linked trainees, those in employment and those seeking employment. These training courses take place in six faculties:

- The Faculty of Science and Technology
- The Faculty of Literature, Languages and Social Sciences
- The Faculty of Law, Economic Sciences and Management (with a Law School branch in Laval)
- The National School of Engineering of Le Mans (ENSIM)
- The Technological Institute of Le Mans
- The Technological Institute of Laval

Le Mans Université, Non-Stop Movement!

Students better prepared for the world of work

Le Mans Université is constantly aware of the changing nature of the job market, and so regularly innovates and adapts its teaching methods and its course content. Numerous professionals contribute to the elaboration of the courses and to the delivery of the classes themselves, at all levels (technological institute degrees, professional degrees, masters, and engineering specialties) or conferences.

Half of all students are registered in a professionalising specialisation course.

A university in synergy with the business world

As an important figure in the planning and development of the region, Le Mans Université shows its willingness to develop and increase its partnerships with the local, regional, national and international socio-economic environment, each day. The University has developed a Research, Innovation, Science and Society Directorate (*Direction de la Recherche, Innovation, Sciences et Société - DRIS*), promoting innovation, technology transfer and the know-how of our laboratories to firms; a department to help people enter the professional world; and a department of continuing education to respond to the training needs of businesses and individuals.

Understanding the stakes of international concerns

International students make up 17,6% of the university's student body, allowing Le Mans Université to demonstrate its openness to the wider world and its attractiveness on an international scale (national average: 13%).

Every year, more and more students from around the world come to Le Mans to discover the assets of the University and to help it shine.

Le Mans Université our ambition: you

To get to know us better, read through this text, which translates who we are and the ambition that we have for everyone here.

And if you are curious, read it again, this time from bottom to top, to discover... who we will never be.

Be it today or tomorrow,
You must remain unique and cultivate your difference.
Don't believe those who tell you:
You don't count.
We are absolutely certain
Yes
Excellence and fulfillment exist...
You can hope that
The University will offer you everything,
Don't imagine that
Your possibilities are limited.
You can gaze upon the future with ambition!
Stop imagining, stop thinking that
Success isn't within your reach,
We assure you.
