

Programme: European transnational partnerships

ALLIES Autonomous Lifelong Learning Intelligent Systems	
Le Mans investigator: Anthony LARCHER	Laboratory: LIUM
Duration: October 2017 – September 2020 (36 months)	Grant ID:
Call: CHIST-ERA	

Summary:

The goal of the ALLIES project is to encourage and demonstrate the development of autonomous systems, able to sustain performance across time according to a given learning scenario. Such unsupervised system will be able to auto-update and perform self-evaluation to be aware of the evolution of its own knowledge acquisition.
